Professional Summary

Expert Full-Stack Developer specializing in building enterprise-grade web applications with modern JavaScript ecosystem. Proven expertise in architecting scalable solutions using React.js, Next.js, and Node.js, with deep knowledge of both SQL and NoSQL databases. Experienced in delivering production-ready applications from concept to deployment, with a focus on performance optimization, clean architecture, and exceptional user experiences.

Core Technical Expertise

Languages & Runtime

- JavaScript (ES6+)
- TypeScript
- SQL
- HTML5
- CSS3
- Node.js

Frontend Specialization

- React.js
- Next.js (App Router & Pages Router)
- Tailwind CSS
- Framer Motion
- Vite
- TypeScript
- Responsive Design
- Performance Optimization

Backend Specialization

- Node.js
- Express.js
- RESTful API Design
- Prisma ORM
- Authentication & Authorization (JWT, OAuth 2.0)
- API Security Best Practices

Database Expertise

- PostgreSQL (Relational Design, Query Optimization)
- MongoDB (Document Modeling, Aggregation Pipeline)
- Firebase (Real-time Database, Authentication)

DevOps & Tools

- Git & GitHub (Version Control, CI/CD)
- Vercel
- Sanity.io
- Postman
- Cypress (E2E Testing)
- Agile/Scrum Methodologies

Professional Experience

Freelance Full-Stack Developer

Jan 2024 – Present

- Architected and delivered production-ready full-stack applications using React.js, Next.js, Node.js, and PostgreSQL for clients in beauty and hospitality industries
- Engineered robust RESTful APIs with Express.js, implementing secure authentication flows and real-time data validation

- Designed and optimized PostgreSQL database schemas using Prisma ORM, ensuring data integrity and query performance
- Built responsive, animated user interfaces using modern React patterns, Tailwind CSS, and Framer Motion
- Implemented complete CI/CD pipelines with GitHub and deployed scalable applications on Vercel
- Managed end-to-end project lifecycle using Agile methodologies, from requirements gathering to post-deployment support
- Collaborated remotely with stakeholders to translate business requirements into technical solutions

IT Specialist *Sep 2019 – 2023*

Department of Labor and Employment

- Managed and processed payroll systems for government-funded programs, handling sensitive data for hundreds of beneficiaries
- Developed automated workflows for data collection and reporting using spreadsheets and internal management systems
- Provided comprehensive technical support for hardware, software, and systems integration
- Created multimedia content and presentations for government programs and inter-agency communications
- Conducted training sessions and technical orientations for program participants

Featured Projects

PUDCI – Diagnostic Center Corporate Website

Production Application | Next.js, TypeScript, Tailwind CSS, Sanity.io

- Developed a comprehensive corporate website for a leading diagnostic center established in 1989, serving multiple branches across Metro Manila
- Architected a scalable Next.js application with server-side rendering for optimal SEO and performance
- Built dynamic location finder system showcasing 6+ branch facilities with interactive mapping
- Implemented diagnostic checker tool to help patients understand required tests based on symptoms
- Created comprehensive service catalog featuring ultrasound, CT-scan, and diagnostic services
- Designed responsive, accessible interface with smooth animations and modern UI/UX patterns
- Integrated HMO partner showcase and patient testimonials system for enhanced credibility
- Deployed on production with optimized performance metrics and mobile-first responsive design

Escape-Beyond – Travel Booking Platform

Next.js Application | TypeScript, Tailwind CSS, Framer Motion

- Developed server-side rendered travel booking website using Next.js 14 App Router for optimal SEO and performance
- Created dynamic, type-safe components with TypeScript for maintainable codebase
- Implemented complex multi-step booking flow with form validation and guest management
- Designed smooth page transitions and micro-interactions using Framer Motion
- Built responsive, mobile-first design system with Tailwind CSS

Link: <https://escape-ph.vercel.app/>

OOTB Creatives – Marketing Website

Next.js, TypeScript, Tailwind CSS

- Delivered a modern marketing website for a creative agency specializing in events management and digital marketing
- Utilized Next.js for optimal performance and TypeScript for type-safe development
- Implemented responsive design patterns and smooth animations for enhanced user engagement

Education

Bachelor of Science in Information Technology

University of the East, Philippines | 2019

Certifications & Training

- The Odin Project – Full Stack JavaScript Path (Completed)

- Self-directed continuous learning in modern web technologies and best practices

Professional Attributes

- Technical Excellence
- Problem-solving & Debugging
- Clean Code Advocate
- Performance Optimization
- Collaboration
- Remote Team Communication
- Client Relations
- Agile Development
- Continuous Learning • Self-Motivated • Adaptable • Detail-Oriented
